

## Carbon Management Plan – 2015/16 Performance Update

	2015/16 tCO <sub>2</sub> e	% change from 2014/15	% change from 2005 baseline
Scope 1 & 2 Carbon Emissions	1,033	-14%	-40%
Scope 3 Emissions from Staff Commuting	315	-3%	Not available
Scope 3 Emissions from Student Commuting	242	+9%	Not available
Scope 3 Emissions from Water	7	+10%	Not available
Scope 3 Emissions from Waste	32	+73%	Not available

### Additional Notes

1. Scope 3 emissions from waste have increased significantly due to a new contract changing from waste to energy to landfill. This will return to lower levels 2016/17.
2. Purchasing emissions are not calculated as the only available methodology is using spend on different areas, which does not reflect accurately sustainability decisions of switching to, for example, a local supplier or product.
